Rubrics	Score	
Accept MIPS program		5
Error checking: opcode		5
Error checking: Register name		5
Error checking: labels		5
Generate correct opcode in a separate screen (binary)		5
Generate correct opcode in a separate screen (Hex)		5
Pipeline map		15
Input value in Register with value check		5
Input value in memory with value check		5
Execution: Correct value after execution (internal registers)		25
Execution: Correct value after execution (registers)		5
Execution: Correct value after execution (memory)		5
Graphic User Interface (GUI)		5
Integrated Environment		5
Total		100
